

NEERAV BHUYAN

Statistics & Data Science Student

neeravbhuyan@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio Website](#) | New Delhi, India

Statistics and Data Science student combining statistical reasoning, mathematics, and programming to build models that learn, perceive, and support decisions. Experienced with regression, convex optimization, and applied ML through hands-on internship and independent projects.

EDUCATION

Indian Statistical Institute, Delhi — Bachelor of Statistical Data Science (66 % in Semester 1, 73.2 % in Semester 2)

2025 – Present • New Delhi, India

- Coursework: Probability Theory, Real Analysis, Statistical Inference, Optimization & Numerical Methods

EXPERIENCE

IIT Ropar — NS2ML-DE 2026 Workshop Participant

July 2026 • Rupnagar, India

- Explored numerical PDE/ODE solvers and Physics-Informed Neural Networks through MATLAB/Python labs led by domain experts.

PROJECTS

Billboard Top Songs Analysis (2018–2025)

- Analysed 800 Billboard Hot 100 tracks using R and Python, integrating Spotify API, Maven Analytics, and AcousticBrainz data; applied KNN imputation and explored acoustic trends behind chart success.

Constrained LPG Allocation Model

- Formulated a strictly convex Quadratic Programming model to optimally allocate India's rationed LPG supply across sectors amid supply-chain disruption.

SKILLS

Languages	Python, R, JavaScript, TypeScript, CSS
Statistical Methods	Regression Analysis (Linear/Logistic), Random Forest, Hypothesis Testing, QP/Convex Optimization, Statistical Modelling
Libraries & Tools	Pandas, NumPy, dplyr, ggplot2, lattice, caret, scikit-learn, matplotlib, RStudio, VS Code, Git

ACHIEVEMENTS

- AIR 18 — Indian Statistical Institute BSDS Merit List
- 98.36 percentile overall (98.98 in Mathematics) — JEE Main 2025
- 99.97 percentile in Mathematics — CUET (UG) 2025
